

A truly effective scraper

Scraper attachment KV-series

- Frees persistent dirt
- Versatile use
- Wear resistant scraper bars
- Suspended scraper bars

Profile ADLER-Scraper attachment KV-series

Show dirt what you've got.

Business before pleasure! Don't forget about scraping after the job has been done! Debris and spillage on roads due to harvesting and other work in the fields pose a serious safety hazard. As the person responsible, you are legally required to take corrective action in such cases. The ADLER-Scraper attachments KV-series offer an optimum solution. The KV-series is ideal for use on bends, roads, lanes, paths and open spaces – any place where stubborn dirt from soil and clay earth makes it difficult to sweep.

With the KV-series, you'll always achieve a clean end result no matter whether you mount the Scraper attachment in front of your tractor or wheel loader, combine it with one of our sweepers or you scrape at the front and sweep at the rear while driving your tractor.

Accessories:

- Hydraulic swivel for direct attachment
- Mounting options for direct attachment:
3-point hitch or universal attachment for wheel, telescopic and front loaders
- 3rd support wheel for optimum floor guidance
